

Save money on an energy-efficient electric *water heater* for your new home, **AND...**

This home will **NEVER** need another water heater.

All-electric new homes that receive electric service from Volunteer Energy Cooperative may qualify for a \$100 credit toward the power bill.

Terms:

Purchase and install a qualifying electric water heater with a manufacturer's **lifetime warranty** for the new home. Complete and submit the proper paperwork and, after an on-site validation, VEC will credit your power account.

Validation/Requirements:

Customer must complete VEC's New Home Inspection form and Lifetime Warranty Water Heater form. The form must be returned to VEC and a new home inspection scheduled. After the new home/water heater on-site validation by VEC's TVA *energy right*® inspector, the customer will receive a \$100 credit toward the power bill. Limit one \$100 credit per qualifying home.

Home must be "all-electric" (all major appliances must be electric) to qualify. Eligible water heaters with lifetime warranties include Marathon models and Whirlpool and U.S. Craftmaster "Self Cleaning with Energy Smart Control" models. Additional information regarding the water heaters can be viewed at:

www.marathonheaters.com or www.whirlpoolwaterheaters.com/products/electric.

Customer may be asked to provide proof of purchase or documentation that the water heater is a model that qualifies under this program. Warranty for the water heater is provided by the manufacturer, not by Volunteer Energy Cooperative or TVA. The water heater must be installed in the new home prior to the inspection. Allow 4 - 6 weeks for the credit to be applied. All paperwork and documentation must be submitted to VEC in order to qualify.

Qualifying models include:

- Marathon Lifetime Warranty Water Heaters
- Whirlpool and U.S. Craftmaster Model EE3Z50RD055V (50 gallons)
- Model EE3Z80HD055V (80 gallons)

VEC Lifetime Warranty Water Heater Form

Contact Name: _____

Contact Phone #(s): _____

Address of New Home: _____

City, State, Zip, County: _____

VEC Account # Where Credit Should Be Applied: _____

Brand of Water Heater: _____

Model #: _____ Serial #: _____

To qualify for the credit, the new home must be all-electric and owner must agree to an *energy right*® new home inspection (see requirements above).
Form revised 3/22/2007

I have read and understand the program requirements (above) and agree to abide by these requirements. I hereby verify that, to the best of my knowledge, the new home listed above and the water heater that is installed qualifies for this program. I will provide proof of purchase if it is requested.
